EXPERIENCE

UI UX Developer

Altcare Pvt

Apr 2025 - Present

Belagavi, Karnataka

- Currently working on a Medical Data Analysis project focused on visualizing and interpreting healthcare inventory trends.
- Building a responsive frontend using React.js and Tailwind CSS, including dynamic components and layout for seamless user interaction; hosted on Netlify.
- Ensuring mobile responsiveness, accessibility, and clean UI/UX design aligned with medical industry standards.

PROJECTS

Crop Insurance: (Developing a web-based crop insurance system as part of a college societal project using HTML, CSS,JavaScript,PHP and SQL.The system aims to help farmers register, apply for insurance, and claim benefits efficiently. PHP manages backend logic, SQL handles database operations, and JavaScript enhances user interactivity. The project focuses on secure data handling and a user-friendly interface to improve accessibility)

Tourism website: I developed the website dandeligreenadventure.in using modern web technologies to ensure a responsive and user-friendly experience. The site was built with HTML5, CSS3, and JavaScript, Mobile-friendly design using Bootstrap. Interactive elements (package selection, contact forms) via JavaScript. SEO best practices for better search visibility. Social media integration and email contact system for user engagement.

CERTIFICATIONS
